Another Innovation from Evermark!

Flexibility, Performance & Value to Match Your Style

EverMark has created a frame system that surpasses the competition again. FiberGuard™ provides not only long lasting performance at a superb value, but also the ability to stain your parts to exactly match your fiberglass door panel. Offered in common widths and lengths, FiberGuard™ jambs and mulls are available with straight end-cuts, or fabricated to your specifications. FiberGuard™ jambs can also be milled, drilled, cut and nailed like standard wood jambs.

A Complete Line of Exterior Frame Components

Jambs • Mulls • Trim

CHOOSE FROM TWO DESIGN OPTIONS

▶ FIBERGUARD with "EndSeal"

Provides jamb, mull bottom and brickmould with long lasting protection from water and insect damage by sealing bottom end-grain with durable moisture resistant coating.

OR

▶ FIBERGUARD DELUXE* with PVC Bottom Block

Constructed with a 2" bottom block of PVC, the FiberGuard Deluxe* option provides premium protection that is guaranteed to forever eliminate moisture wickage through the bottom of the jamb - the No.1 cause of frame failure.

▶ Both Options come standard with a Stainable Fiberglass Cap

Bonded with a high-quality, exterior grade adhesive, this grained fiberglass cap becomes an integral part of each jamb or mull post. Dent resistant, scratch resistant and impervious to rot - The 1/8" fiberglass cap is glued directly to the wood to provide jambs and mulls with long lasting stability and protection.

*patent pending

FiberGuard™

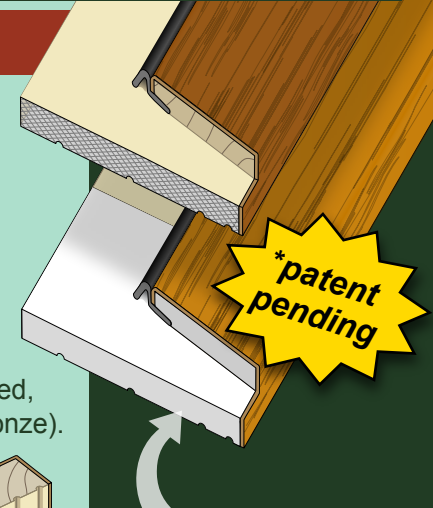

Fiberglass Capped Exterior Frame Products

FiberGuard® exterior frame products provide a beautiful solution to moisture wicking and the resultant frame rot, insect infestation and costly call-backs. Plus, a low-maintenance, dent-resistant and stainable fiberglass cap provides the look and warmth of wood while providing a means to perfectly match to the finish you apply to your fiberglass door. A wide array of sizes and options gives you flexibility and control — from inventory to installation.

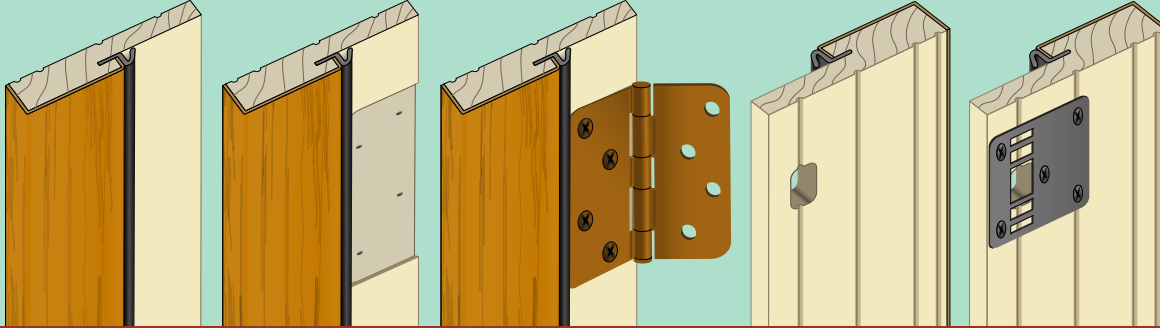

FiberGuard™ Jamb

- Unique exterior door jamb combining quality double-primed, fingerjoint wood with a fiberglass cap which is impervious to rot.
- Fiberglass cap is bonded to jamb with a high-quality, exterior grade adhesive.
- Frame sizes available
Nominal sizes
- Machining options include head and sill dado, hinge prep mortising, strike and deadbolt preps & pilot holes.
- Optional accessories include pre-installed security strike plate, hinges (US2-D, US3/4, primed, US4 and many others) and weatherstripping (compression or magnetic, both in beige or bronze).

WIDTHS			HEIGHTS	
4-9/16"	5-1/4"	6-9/16"	6'8"	8'0"

Choose from optional "EndSeal" or FiberGuard Deluxe* with a 2" solid PVC bottom block to provide frames with long lasting protection.

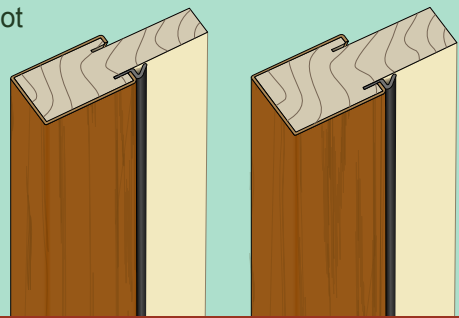

FiberGuard™ Mulls

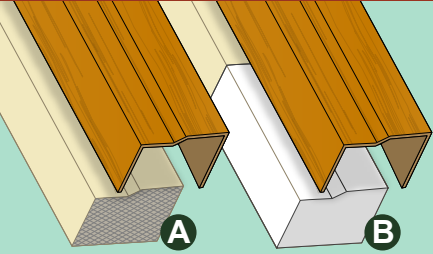

- Attractive, primed with a rot-free fiberglass cap that will not warp, check, split or wick moisture. Like FiberGuard™ jambs, mullions are available with factory-applied hinges and several weatherstripping options.
- Mull sizes available:
Nominal sizes.

HEIGHTS	
6'8"	8'0"

- Standard: 1" x 2" x 4-3/8"
- Fat Boy: 1-1/2" x 2-1/2" x 4-3/8"

FiberGuard™ Trim

- Beautifully moulded brickmould with a bonded, 1/8" fiberglass cap to complement FiberGuard™ Jamb and Mulls.
- Available with optional "EndSeal" **A** and as FiberGuard Deluxe* with a bottom block of solid PVC **B**.
- Standard brickmould profiles available. Miter cut and available in all lengths.

The FiberGuard™ Limited Lifetime Warranty

EverMark, LLC warrants their FiberGuard™ exterior door frame products against degradation of the cellular vinyl profiles for as long as the original purchaser owns the FiberGuard™ product. Should degeneration occur, rendering the jamb unable to support a hinge or sill, EverMark, LLC will replace the jamb without cost to the consumer for parts. Proof of purchase is required. This warranty applies to FiberGuard™ products used in residential construction and to the original purchaser only, for as long as the original purchaser owns the FiberGuard™ product. This warranty does not cover defects in the finish or damage caused by improper painting, caulking or installation. This warranty is void if product is damaged through improper or unreasonable use. This warranty is void if any portion of the vinyl profile has been removed. FiberGuard™ products are not covered in warranty if not properly maintained. Storm door installations, associated with our product, require sufficient ventilation to eliminate excessive heat build-up in the airspace between both doors. Failure to comply with this requirement voids this warranty.

Please note: It is a requirement of this warranty that the customer keeps and provides all invoices, receipts, and other relevant documents received at the time of purchase or for the maintenance of the door system and its components. For optimum performance, FiberGuard™ products should be painted within 60 days of installation.
