

ProCap™ Jambs

by

Featuring

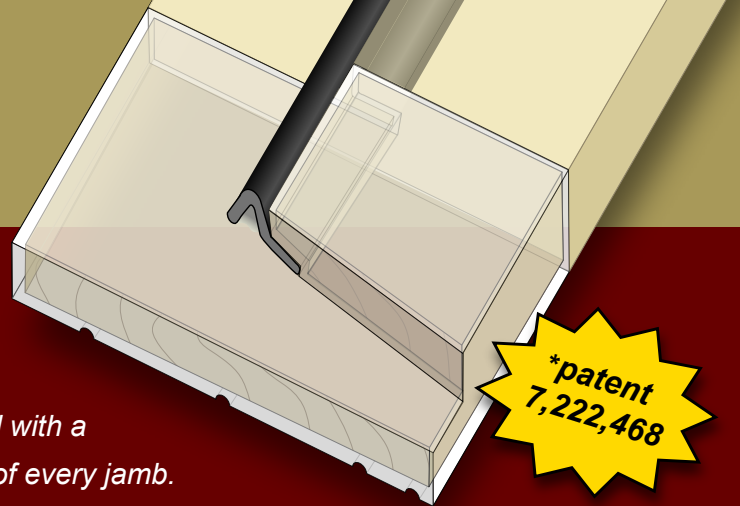

EVERMARK'S PATENTED FRAME SLEEVE TECHNOLOGY

*EverMark raises the bar again
with value oriented innovation.*

*ProCap jambs go the
distance with premium
double primed, fingerjoint
wood combined with a
unique PVC sleeve
that ensures
zero moisture
wickage.*

The EverMark Frame Sleeve is a form fitting PVC shell that completely seals the end of the jamb, providing an extraordinary combination of value and performance. Jambs are precision machined to accommodate the sleeve which is bonded with a high-quality, exterior grade adhesive, making it a seamless part of every jamb.

- Superior construction process enhances structural integrity of jamb while fusing rot-free PVC bottom sleeve to prevent moisture wicking and the resultant frame rot, insect infestation and costly call-backs.

- Machining Options include hinge prep mortising, strike and deadbolt prep and pilot holes.
- Options include pre-installed security strike plate, hinges and weatherstripping.
